

ILLUMINATED PIXELS: The Why, What, and How of Digital Lighting

By Virginia Bowman Wissler

INDEX

PART I

Foundations (Introduction to the “How”)

1 First Things First

1.1 Getting Started Lighting a Scene

- 1.1.1 Set-up for Placing Lights
- 1.1.2 Introduction to the Virtual 3D Camera

1.2 Basic Computer-Generated Light Types

- 1.2.1 Point Light
- 1.2.2 Directional Light
- 1.2.3 Spotlight
- 1.2.4 Area Light
- 1.2.5 Ambient
- 1.2.6 Volume Light
- 1.2.7 Section Summary: Comparison of Basic Light Types

1.3 Simple Lighting Technique

- 1.3.1 Tips on Interactive Placement of Lights
- 1.3.2 Light Linking
- 1.3.3 Specular- and Diffuse-only Lights

1.4 Render Basics

- 1.4.1 Brief Overview of Rendering Algorithms
- 1.4.2 Introduction to Render Settings

1.5 Chapter Conclusion

- 1.5.1 Important Points
- 1.5.2 Terms
- 1.5.3 Exercises

2 Shadows

2.1 Before Technique

- 2.1.1 Types of Shadows
- 2.1.2 Shadow Size
- 2.1.3 The Art of Shadows

2.2 Shadow Basics

- 2.2.1 Depth-Mapped and Ray-Traced Shadows
- 2.2.2 Adding Shadows
- 2.2.3 Introduction to Shadow Blur

2.3 Shadow Generation

- 2.3.1 Depth-Mapped Shadows
- 2.3.2 Ray-Traced Shadows
- 2.3.3 Introduction to Deep Shadows
- 2.3.4 Introduction to Ambient Occlusion

2.4 Shadow Parameters

- 2.4.1 Shadow Blur
- 2.4.2 Shadow Density and Color
- 2.4.3 Shadow Samples
- 2.4.4 Bias
- 2.4.5 Shadow Resolution

- 2.5 Shadow Workflow and Efficiency Tips**
 - 2.5.1 Setting Objects' Shadow Attributes
 - 2.5.2 Optimizing Mapped Shadows
 - 2.5.3 Tips on Adding Shadows and Troubleshooting
- 2.6 Gallery of Shadow Problems and Solutions**
- 2.7 Chapter Conclusion**
 - 2.7.1 Important Points
 - 2.7.2 Terms
 - 2.7.3 Exercises

PART II

The Goals of Lighting (the “Why”)

3 Goal 1: Establishing Setting

- 3.1 Time of Day**
- 3.2 Weather**
- 3.3 Location**
- 3.4 Setting and Story**
- 3.5 Chapter Conclusion**
 - 3.5.1 Important Points
 - 3.5.2 Terms
 - 3.5.3 Exercises

4 Goal 2: Creating Mood

- 4.1 Visual Tension**
 - 4.1.1 Contrast
 - 4.1.2 Hiding and Revealing Elements
 - 4.1.3 The Unexpected and Chaotic
- 4.2 Color and Emotion**
 - 4.2.1 Color Associations
 - 4.2.2 Color Combinations
 - 4.2.3 Using Color Symbolically
- 4.3 Revealing Action, Ambiance, and Character**
- 4.4 Chapter Conclusion**
 - 4.4.1 Important Points
 - 4.4.2 Terms
 - 4.4.3 Exercises

5 Goal 3: Directing the Eye

- 5.1 Composition**
- 5.2 Visual Attractors**
 - 5.2.1 Principles of Visual Organization
 - 5.2.2 The Role of Lines
 - 5.2.3 Object on a Field
 - 5.2.4 Movement
 - 5.2.5 Other Attractors
- 5.3 Chapter Conclusion**
 - 5.3.1 Important Points
 - 5.3.2 Terms
 - 5.3.3 Exercises

6 Goals 4 - 6: Creating the Illusion of Dimension

- 6.1 Goal 4: Creating Depth**

- 6.1.1 Depth Cues
- 6.1.2 Creating Flat Space
- 6.2 Goal 5: Sculpting Volume**
- 6.2.1 Considering the Incident Angle
- 6.2.2 Lighting a Cube, “Plane” and Simple
- 6.2.3 Light Position and Sculpting Form
- 6.2.4 Using Pattern to Reveal Form
- 6.3 Goal 6: Revealing Substance**
- 6.4 Chapter Conclusion**
- 6.4.1 Important Points
- 6.4.2 Terms
- 6.4.3 Exercises

7 Goals 7 - 10: Providing Cohesiveness and Visual Interest

- 7.1 Goal 7: Maintaining Continuity**
- 7.1.1 Components of Film Narrative
- 7.1.2 Continuity Style
- 7.1.3 Light and Continuity
- 7.2 Goal 8: Integrating Digital Elements**
- 7.3 Goal 9: Setting the Visual Style**
- 7.3.1 Developing a Visual Style
- 7.3.2 Level of Realism
- 7.4 Goal 10: Creating Visual Interest**
- 7.5 Chapter Conclusion**
- 7.5.1 Important Points
- 7.5.2 Terms
- 7.5.3 Exercises

PART III

The Properties of Light (the “What”)

8 Light Placement

- 8.1 Direction**
- 8.2 Distance**
- 8.3 Making it Right**
- 8.3.1 How Realistic Should It Be?
- 8.3.2 Positioning for Animation
- 8.4 Chapter Conclusion**
- 8.4.1 Important Points
- 8.4.2 Terms
- 8.4.3 Exercise

9 Light Intensity

- 9.1 Controlling Luminance**
- 9.1.1 Radiant, Incident, and Reflected Light
- 9.1.2 Factors Affecting Scene Luminance
- 9.1.3 Attenuation
 - Real-World Attenuation
 - Digital Attenuation
- 9.2 Evaluating Luminance**
- 9.2.1 Real-World Measurements
- 9.2.2 The Relative Nature of Luminance Perception

9.2.3 Digital Measurements – Pixel Probes and Histograms

9.3 Capturing Luminance

9.3.1 Clipping

9.3.2 Introduction to High Dynamic Range Images (HDRI)

9.4 Chapter Conclusion

9.4.1 Important Points

9.4.2 Terms

9.4.3 Exercises

10 Light Diffusion

10.1 Overview of Light Diffusion

10.2 Hard Light

10.2.1 Sources of Hard Light

10.2.2 Distinctive Characteristics of Hard Light

10.3 Soft Light

10.3.1 Distinctive Characteristics of Soft Light

10.3.2 Sources of Soft Light

10.4 Chapter Conclusion

10.4.1 Important Points

10.4.2 Terms

10.4.3 Exercises

11 Light Color

11.1 The Science of Color

11.1.1 The Visible Spectrum

11.1.2 Color Perception

11.2 Color Temperature

11.2.1 The Kelvin Scale

11.2.2 White Balance: Our Camera’s Little White Lie

11.3 Light and Pigment

11.3.1 Pigment Color

11.3.2 Light Color

11.4 Digital Color Representation

11.4.1 RGB and CMYK Color Models

11.4.2 HSV, HSB, and HSL Color Models

11.5 Light and Surface Color Interaction

11.6 Chapter Conclusion

11.6.1 Important Points

11.6.2 Terms

11.6.3 Exercises

PART IV

Technique (More “How”)

12 Three Point Lighting and Beyond

12.1 Three Point Lighting

12.1.1 Overview of Three Point Lighting

12.1.2 Key Light

12.1.3 Fill Light

12.1.4 Bounce Light: A Special Type of Fill Light

12.1.5 Rim Light

12.1.6 Section Summary: A Final Comparison

12.2 Beyond Three Point Lighting

- 12.2.1 When Less is More - One and Two Point Lighting
- 12.2.2 When More is More – Background Lights, Kickers, Eyelights, and Practicals
- 12.2.3 Environment and Multi-Character Lighting

12.3 Chapter Conclusion

- 12.3.1 Important Points
- 12.3.2 Terms
- 12.3.3 Exercises

13 Camera Essentials

13.1 Lens Work: Field of View and Depth of Field

- 13.1.1 The Lens
- 13.1.2 Field of View
- 13.1.3 Depth of Field

13.2 Camera Exposure

- 13.2.1 Shutter Speed
- 13.2.2 Aperture
- 13.2.3 This Business of ‘Stops’
- 13.2.4 Film’s Response to Light

13.3 Motion Blur

13.4 Chapter Conclusion

- 13.4.1 Important Points
- 13.4.2 Terms
- 13.4.3 Exercises

14 Rendering for the Artist

14.1 Render Workflow

- 14.1.1 The Need for Speed
- 14.1.2 Workflow for Batch Rendering

14.2 Scanline and Ray Tracing “Under the Hood”

- 14.2.1 Scanline Rendering: Short and Sweet
- 14.2.2 Ray Tracing: A Matter of Rays

14.3 Ray-Traced Reflections and Refractions

- 14.3.1 Ray Limits
- 14.3.2 Blurred Reflections and Refractions
- 14.3.3 The Fresnel Effect
- 14.3.4 Artistic Considerations

14.4 Quality Control

- 14.4.1 Aliasing: The Problem of Samples
- 14.4.2 Aliasing Artifacts
- 14.4.3 Anti-Aliasing: Solving the Problem

14.5 Chapter Conclusion

- 14.5.1 Important Points
- 14.5.2 Terms
- 14.5.3 Exercises

15 Tricks of the Trade

15.1 Shaping Light

- 15.1.1 Gobos, Slides, and Barn Doors
- 15.1.2 Volume Lights, 3D Textures, and Blockers

15.2 Advanced Shadow Techniques

- 15.2.1 Using Deep Shadows

- 15.2.2 Advanced Mapped Shadow Techniques
- 15.2.3 Shadow-Only Lights
- 15.3 Faking Soft Light**
- 15.3.1 Using Multiple Light Sources to Soften Light
- 15.3.2 Using Shaders to Soften Light
- 15.4 Simple Effects – Fog Lights, Atmosphere, and Glows**
- 15.4.1 Fog Lights
- 15.4.2 Atmosphere
- 15.4.3 Glows
- 15.5 Chapter Conclusion**
- 15.5.1 Important Points
- 15.5.2 Terms
- 15.5.3 Exercises

16 Global Illumination

- 16.1 Defining Global Illumination**
- 16.1.1 Definition Madness
- 16.1.2 (Very) Brief History of GI in Animation and VFX Production
- 16.1.3 Pros and Cons of Global Illumination
- 16.2 Common Means of Generating Global Illumination**
- 16.2.1 Radiosity
- 16.2.2 Final Gather
- 16.2.3 Photon Mapping
- 16.2.4 Path-Traced Global Illumination
- 16.2.5 Point-Based Global Illumination
- 16.3 Working with Global Illumination**
- 16.3.1 Getting Started with Global Illumination
- 16.3.2 General Tips when Using Global Illumination
- 16.4 Ambient and Reflection Occlusion**
- 16.4.1 Creating Ambient Occlusion
- 16.4.2 Storing Occlusion Data
- 16.4.3 Bringing Ambient Occlusion Back In
- 16.4.4 Tips for Using Ambient Occlusion
- 16.4.5 Reflection Occlusion
- 16.5 Chapter Conclusion**
- 16.5.1 Important Points
- 16.5.2 Terms
- 16.5.3 Exercises

17 Image Based Lighting and More

- 17.1 Image-Based Lighting**
- 17.1.1 Advantages and Disadvantages of IBL
- 17.1.2 Working With IBL
- 17.2 Mapped Reflections and Refractions**
- 17.2.1 Mapped Reflections
- 17.2.2 Mapped Refractions
- 17.3 Creating Environment Maps**
- 17.4 Lighting With Cards**
- 17.5 Evaluating a Live-Action Plate**
- 17.5.1 Reference Imagery
- 17.5.2 Seeing the Light
- 17.6 Chapter Conclusion**
- 17.6.1 Important Points

- 17.6.2 Terms
- 17.6.3 Exercises

18 Multi-Pass Rendering

18.1 Overview of Passes

- 18.1.1 Advantages of Render Passes
- 18.1.2 Disadvantages of Render Passes

18.2 Pass Generation

- 18.2.1 Primary Outputs/Separate Passes
- 18.2.2 Secondary Outputs

18.3 Common Passes

- 18.3.1 Beauty Passes
- 18.3.2 Cast Shadow Passes
- 18.3.3 Z-Depth Pass
- 18.3.4 Isolation Mattes
- 18.3.5 Shading Component Passes
- 18.3.6 Reflection Passes
- 18.3.7 Illumination Passes
- 18.3.8 Effects Passes

18.4 Linear Workflow

- 18.4.1 Logarithmic Color Space
- 18.4.2 Why Linear?
- 18.4.3 Bit Depth

18.5 Chapter Conclusion

- 18.5.1 Important Points
- 18.5.2 Terms
- 18.5.3 Exercises

PART V

Interviews with the Pros

- 19 Interview with Rob Bredow, Chief Technology Officer, Sony Imageworks**
- 20 Interview with Mohit Kallianpur, Lighting and Look Director, Disney**
- 21 Interview with Andrew Whitehurst, Visual Effects Supervisor, Framestore**
- 22 Interview with Senior Technical Directors Michael Kennedy and Quentin Frost**

INDEX
